

ALFALFA LUCERNE PELLETS SPECIFICATIONS

| ENERGETIC VALUE | |
|----------------------|---------------|
| RUMIANTS | |
| METABOLIZABLE ENERGY | 1.905 Kcal/Kg |
| LACTATION NET ENERGY | 1.155 Kcal/Kg |
| MANT. NET ENERGY | 1.370 Kcal/Kg |
| GROWTH NET ENERGY | 650 Kcal/Kg |
| T.D.N. | 58% |

| PIGS | |
|----------------------|---------------|
| DIGESTIBLE ENERGY | 1.900 Kcal/Kg |
| METABOLIZABLE ENERGY | 1.750 Kcal/Kg |
| NET ENERGY | 1.150 Kcal/Kg |

| BIRDS | |
|------------------|-------------|
| CHICKEN STARTER | 750 Kcal/Kg |
| CHICKEN FINISHER | 900 Kcal/Kg |
| LAYING HENS | 900 Kcal/Kg |

| RABBITS | |
|-------------------|--------------|
| DIGESTIBLE ENERGY | 1850 Kcal/Kg |

| HORSES | |
|-------------------|--------------|
| DIGESTIBLE ENERGY | 1950 Kcal/Kg |

| ELEMENTAL COMPOSITION | |
|-----------------------|--------|
| DRY MATERIAL | 90% |
| RAW PROTEINS | 16% |
| RAW FIBER | 25% |
| RAW FAT | 2,50% |
| RAW ASH | 10,40% |
| FDN | 43% |
| FDA | 30,60% |
| LAD | 7,80% |
| VEGETABLE WALLS | 43,80% |
| TOTAL SUGARS | 3,50% |
| STARCH | 2,20% |

| ADVANTAGES |
|--|
| <ul style="list-style-type: none"> • Easy use in mixtures • Easy transportation and storage saving • Better monitoring and consumption regulation • Higher protein contribution • Intact nutritious qualities for over 5 years that keep colour, scent and flavour • Better conservation and preservation against insects, fungi and mycrotoxins |

Alfalfa Pellets is a source of vitamins and minerals with good palatability. It is mainly used for feeding small ruminants, pigs, horses, rabbits, birds and poultry. Besides supplying directly, balanced feed producers reprocess Alfalfa Pellets in order to use it as one of the components for the manufacturing of other balanced feed. The Alfalfa Pellets process is made by grinding rolls of that pasture. Ground and dehydrated Alfalfa goes through a compacting and pressing process whereby the finished product is obtained.

PELLETS DE ALFALFA

El pellet de alfalfa es una fuente de vitaminas y minerales además de tener una buena palatabilidad. Se usa para la alimentación de pequeños ruminantes, cerdos, equinos, conejos y aves. Además del suministro directo, los productores de balanceados lo reprocesan para utilizarlo como componente en la fabricación de otros balanceados. La pelletización de la alfalfa se realiza moliendo rollos de dicha pastura. La alfalfa molida y deshidratada se somete a un proceso de compactación y prensado obteniéndose así el producto final.
